JURID®

EMPRESA

Fundada em 1899, a Federal-Mogul tem suas principais indústrias na área automotiva, automóveis comerciais leves, pesados e pesados fora de estrada, geração de energia, aeroespacial, marinha, via férrea e industrial, distribuídos em 93 locais de fabricação, 17 centros de distribuição em 33 países.

No ramo automotivo, tem como principais divisões: Sistema de Transmissão e Motorparts.

Dentro da divisão Motorparts está o segmento Materiais de Fricção, ao qual pertencemos e produz: pastilhas de freios para veículos leves (passeios e utilitários) e pesados (caminhões e ônibus), sapatas, lonas pesadas, disco de freios, lubrificante para freios (BL 20), fluido de freio e acessórios.

No Mercado de Reposição os clientes são distribuidores com depósitos independentes e de grande varejo. Integra com a comercialização, a promoção e suporte de serviços.

No mercado de OE/OES, produz freios para automóveis leves, médios e pesados.

Preocupada com a qualidade, tecnologia e meio ambiente, desde muito cedo buscou ser certificada pelas normas ISO 14001, OHSAS 18001 e ISO/TS 16949.

Para melhor atender as diversas necessidades do mercado, elaborou produtos distintos, tais como, produtos da Marca STOP, uma linha econômica, com preço competitivo e ótima qualidade, e produtos da marca JURID, uma linha Premium, com alta performance e qualidade (mesma marca comercializada junto às montadoras), para atender os clientes mais exigentes.

Os produtos da Federal-Mogul são produzidos nos mais altos níveis de qualidade, atendendo os requisitos das principais montadoras de veículos do mundo e do mercado de reposição.

EMPRESA

Fundada en 1899, Federal-Mogul centra sus principales actividades en la industria automotriz, vehículos comerciales ligeros y pesados, generación de energía, aeroespacial, naval, ferroviario y industrial, más de 93 centros de producción, 17 centros de distribución en 33 países.

En la industria automotriz, tiene las siguientes divisiones: Powertrain (componentes de motor) y Motorparts (artículos para el sistema de frenos y otros componentes de automoción)

Dentro de la división MOTORPARTS es el segmento de materiales de fricción, a la que pertenecemos y produce: pastillas de freno para vehículos ligeros (tours y servicios públicos) y pesados (camiones y autobuses), zapatas, bloques, discos de freno, lubricantes de freno, líquido de freno y accesorios.

En el mercado de repuestos, los clientes de Federal-Mogul son distribuidores con almacenes independientes y grandes minoristas. Integrado a la comercialización están los servicios de promoción y apoyo técnico.

En el mercado original se producen pastillas de freno para vehículos ligeros, medianos y pesados y zapata moldada.

Preocupados por la calidad, la tecnología y el medio ambiente, Federal-Mogul muy temprano buscó ser certificada bajo la norma ISO 14001, OHSAS 18001 y ISO / TS 16949.

Para responder mejor a las diversas necesidades del mercado, se han desarrollado diferentes productos, tales como productos de la marca STOP, una línea económica, con precios competitivos y de alta calidad y productos de la marca JURID, una línea Premium, con alta performance y calidad (misma marca comercializada con los fabricantes de vehículos).

Los productos de la Federal-Mogul se producen en los más altos niveles de calidad y performance, cumpliendo los requisitos de los principales fabricantes de vehículos del mundo y el mercado de repuestos.

BL-20

Lubrificante e Anti-ruído Cerâmico de alta performance para freios

**PROTEJA OS COMPONENTES CRÍTICOS DO FREIO COM
O nosso Melhor Lubrificante**

Lubrificante Premium & Aplicador

- Oferece excelente lubrificação mesmo em temperaturas extremas (-56C +1.648C), prevenindo contaminação e corrosão
- Reduz o ruído do freio criando uma barreira cerâmica protetora entre as partes móveis do freio.
- Lubrificante de base sintética com alto conteúdo cerâmico.
- Resistente à água, sal e sujeira.

Como aplicar

*Embalagem com
pincel aplicador*

*Lubrifica-se os
pinos deslizantes*

*Lubrifica-se as
guias deslizantes
das pastilhas*

*Aplica-se uma
película nas
faces dos pistões*

*Aplica-se uma película
nos punhos das pinças,
onde há contato com
a chapa das pastilhas*

*Aplica-se uma película
nas partes onde há
contato da sapata com
o prato defletor*

Pastilhas de Freios para Pistão de Aço

A Continental Automotive System (Freios Teves), visando melhorias e padronização em seus produtos, vem substituindo os pistões de ferro fundido pelos pistões de aço nas pinças de freio.

Esta implementação vem acontecendo desde 2009 e proporciona vantagens como:

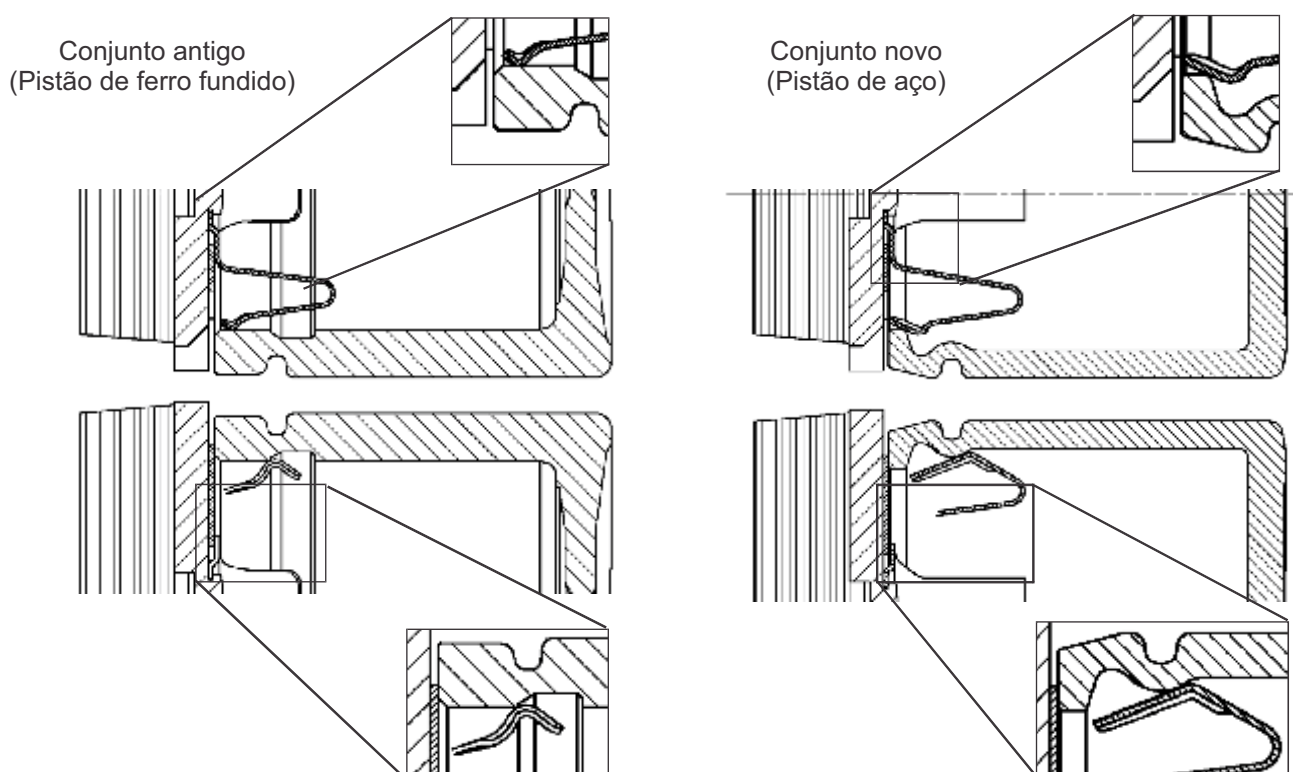

- maior durabilidade no conjunto de pinças de freio.
- maior resistência à corrosão.
- maior resistência a deformações.

Em decorrência disto existe a necessidade de novas molas de fixação das pastilhas de freio, proporcionando um melhor ajuste dos componentes do sistema, diminuindo assim os níveis de ruído, batimento e vibrações.

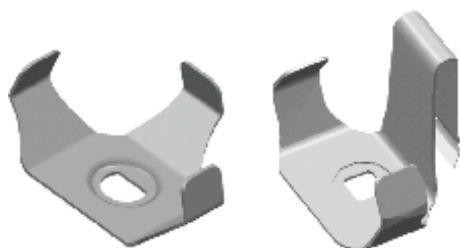

Como a Bendix vem acompanhando todas as inovações e atualizações do mercado automotivo, está disponibilizando nova linha de pastilhas de freio HQ para pinças com pistão de aço a fim de suprir a necessidade que se faz com este novo produto.

Veja abaixo as especificações.

Diferença entre os pistões

Perfil da mola da pastilha para Pistão de Ferro Fundido

Perfil da mola da pastilha para Pistão de Aço

Atenção: As molas das pastilhas não são intercambiáveis entre as aplicações para pistão de aço e ferro fundido. Isto pode causar deformações e ruptura nas mesmas.

COMPARATIVO DE DESEMPENHO

Teste de coeficiente de atrito (μ) realizado em dinamômetro, demonstrando melhor performance das pastilhas Jurid com relação aos concorrentes.

JURID[®]

X

Concorrentes A e B

(*) Fading: Processo em que a pastilha passa por esforço de alta pressão e temperatura em um curto espaço de tempo (Testes realizados em trechos de serra)
